SUMMARY

IT Infrastructure Engineer with experience supporting enterprise and manufacturing environments. Skilled in enterprise networking, virtualization, Windows and Linux infrastructure, backup and disaster recovery, and OT infrastructure. Experienced in maintaining reliable and secure IT operations, delivering infrastructure projects, and supporting business-critical systems. Strong troubleshooting, documentation, and automation skills, with growing exposure to cloud technologies and modern infrastructure practices.

EXPERIENCE

IT Infrastructure Analyst

Mar 2026 – Present

Electrolux Group

- Operate and maintain IT infrastructure onsite, including server, network and workplace PC.
- Manage local server environments (both physical and virtual).
- Manage internal LAN/Wi-Fi connections and collaborate with Global IT for WAN support.
- Manage local workplace, especially all PC and Workstations pertinent to Workshop area.
- Ensure the operability of local IT/server rooms, coordinating with facilities and Global IT.
- Support and drive IT infrastructure-related projects and initiatives.
- Collaborate with Engineering department on digital transformation efforts.
- Liaise with R&D, Logistics and other departments to design and provision infrastructure for labs and warehouses.
- Support the design and provisioning of IT infrastructure for machinery and production equipment, in collaboration with Engineering and IoT Team.
- Work closely to the other members of Local IT Team to deliver a best-in-class IT service.
- Design, develop and field local network infrastructure (L2/L3 switches, fiber optics, LAN, Wi-Fi) in line with Global IT standards.
- Design and implement server architecture in line with Global IT standards.
- Select, procure and install PC and workstations for Factory area.
- Collaborate on OT security asset management and VLAN segmentation.
- Setup Local Infrastructure Security according to Global IT Standards.
- Coordinate with external vendors for workplace management.
- Manage vendor relationships and contracts for local infrastructure and cabling.
- Contribute to the preparation of the annual IT infrastructure budget.
- Support procurement processes for OT and industrial infrastructure.
- Purchase, manage, and patch factory PCs in OT and shopfloor environments.
- Oversee IT asset lifecycle management and disposal.

IT Infrastructure and Systems Specialist

Jun 2025 – Mar 2026

Aegis Integrated Security Solutions

- Configure and manage Cisco switches, ISE, and other network devices.
- Implement and maintain firewalls to protect the organization's network.
- Monitor and secure network traffic to ensure compliance with security standards.
- Troubleshoot and resolve network-related issues.
- Administer Dell iDRAC and PowerScale storage systems.
- Configure and maintain RAID setups for optimized performance and redundancy.
- Manage virtualization platforms, including VMware vCenter, ESXi, Hyper-V and Proxmox.
- Perform regular server maintenance and hardware upgrades.
- Administer Active Directory Domain Services for user management and authentication.
- Ensure group policies, domain trusts, and security configurations are up to date.
- Manage and optimize SQL Server and Oracle databases.
- Perform regular database backups and recovery testing.
- Troubleshoot and resolve database performance issues.
- Develop and maintain a comprehensive backup strategy.
- Configure and test backup systems for data integrity and reliability.
- Design and execute disaster recovery plans to minimize downtime.
- Work closely with the Technical Support team to resolve escalated hardware or software issues.
- Provide training and support for IT staff on advanced system management tools.
- Document processes and maintain an updated IT knowledge base.

IT Specialist

Jul 2022 – Apr 2024

EI Mostafa for Master Batch

- Served as first-line support for users via phone/email/ticketing; resolved hardware, software, and access issues.
- Installed and configured new software and hardware components; handled endpoint setup and troubleshooting.
- Assisted with network administration tasks and supported day-to-day network operations (connectivity, user access, basic L2/L3 checks).
- Supported core infrastructure services including Active Directory, DNS, DHCP, and file services.
- Helped ensure data storage was safe and recoverable by following backup practices and basic restore validation when needed.
- Educated end users on security best practices and safe computer usage (password hygiene, phishing awareness, device handling).
- Coordinated with vendors for repairs/escalations and supported IT asset lifecycle tracking and documentation.
- Documented procedures and improved internal IT workflows to increase consistency and speed of support.

CLOUD & TECHNICAL TRAINING

Cloud Computing Engineering

IT Gate Academy (Remote)

Mar 2025 – Jul 2025

Nasr City, Cairo, Egypt

- Designed and deployed cloud solutions using Microsoft Azure IaaS and PaaS fundamentals.
- Configured virtual machines, storage, and networking with security best practices.
- Implemented Azure RBAC concepts, firewall rules, and core monitoring practices.
- Applied Infrastructure as Code (IaC) concepts and CI/CD fundamentals.
- Completed training tracks aligned with AZ-900, AZ-104, AZ-700, AZ-500, and Veeam VMCE.

Information Technology Infrastructure Engineer

IT Gate Academy (Hybrid)

Jan 2024 – Apr 2024

Nasr City, Cairo, Egypt

- Designed and managed LAN/WAN network environments and applied structured troubleshooting methodologies.
- Configured firewalls and enforced security policies to safeguard digital assets.
- Administered Windows Server Domain Controllers and managed user authentication and access control.
- Participated in training modules aligned with CCNA 200-301, Windows Server 2019, NSE4, and Sophos Firewalls.
- Strengthened documentation, teamwork, and problem-solving skills in a fast-paced environment.

EDUCATION

El Shorouk Academy

BSc. in Management and Information System

Al Shorouk City, Cairo

Aug 2019 – Sep 2023

TECHNICAL SKILLS

Networking & Security: VLANs, Routing, NAT, VPN, FortiGate, Sophos, Cisco Switching, Cisco ISE

Virtualization: VMware vCenter/ESXi, Hyper-V, Proxmox VE, Proxmox Backup Server (PBS)

Systems: Windows Server, Linux (Ubuntu/RHEL), AD DS, DNS, DHCP, GPO

Storage & Backup: RAID, IBM SAN (FC), Backup & Restore validation, DR basics

VMS: Genetec, Milestone, LenSec

Database Management: Microsoft SQL Server

Remote Tools: TeamViewer, AnyDesk, RustDesk, RDP

PERSONAL SKILLS

- Strong decision-making and problem-solving skills.
- Excellent analytical abilities and attention to detail.
- Effective communication and training capabilities.
- Team-oriented and organized.

LANGUAGES

- **Arabic:** Native proficiency.
- **English:** Professional working proficiency.
