

Yossef Mohamed Ali

IT Infrastructure Engineer – Cloud Administration (Azure)

Cairo, Egypt | (+20) 155 304 1880 | yossefali67@gmail.com | LinkedIn: Yossef M. Ali

PROFESSIONAL SUMMARY

Infrastructure Engineer with hands-on experience across on-premises and hybrid environments – virtualization (VMware, Proxmox, Hyper-V), enterprise networking (Cisco, FortiGate, Sophos), Active Directory, and backup/disaster recovery (Veeam). Azure (AZ-900, AZ-104, AZ-700, AZ-500) with the technical foundation to transition into Azure cloud administration. Experienced in troubleshooting, documentation, and improving platform stability across enterprise systems.

CORE EXPERTISE

On-Premises & Hybrid Infrastructure (VMware ESXi/vCenter, Hyper-V, Proxmox VE/PBS) – Active Directory Domain Services & Group Policy – Cisco Switching & Cisco ISE – FortiGate & Sophos Firewalls – VLAN Segmentation & Network Security – Veeam Backup & Replication – Disaster Recovery Planning – SQL Server Administration – PowerShell – Microsoft Azure (AZ-900/104/700/500): VMs, VNets, Entra ID, RBAC, NSGs, Azure Backup, Azure Monitor, Azure CLI – IT Asset Lifecycle Management

PROFESSIONAL EXPERIENCE

IT Infrastructure Analyst

Mar 2026 – Present

Electrolux Group

- Operate and maintain IT infrastructure onsite, including server, network, and workplace PCs.
- Manage local physical and virtual server environments supporting factory operations.
- Administer enterprise LAN/Wi-Fi infrastructure supporting production operations and collaborating with Global IT for WAN connectivity.
- Manage local workplace, especially all PCs and workstations pertinent to the Workshop area.
- Ensure the operability of local IT/server rooms, coordinating with facilities and Global IT.
- Support infrastructure projects and implementation efforts across production and office environments.
- Collaborate with Engineering department on digital transformation efforts.
- Liaise with R&D, Logistics and other departments to design and provision infrastructure for labs and warehouses.
- Support the design and provisioning of IT infrastructure for machinery and production equipment, in collaboration with Engineering and IoT Team.
- Work closely with the other members of the Local IT Team to deliver a best-in-class IT service.
- Design and develop local network infrastructure (Layer 2 & Layer 3 switches, fiber optics, LAN, Wi-Fi) in line with Global IT standards.
- Design and implement server architecture in line with Global IT standards.
- Select, procure, and install PCs and workstations for the Factory area.
- Collaborate on OT security asset management and VLAN segmentation.
- Configure local infrastructure security according to Global IT standards.
- Coordinate with external vendors for workplace management.
- Manage vendor relationships and contracts for local infrastructure and cabling.
- Contribute to the preparation of the annual IT infrastructure budget.
- Support procurement processes for OT and industrial infrastructure.
- Purchase, manage, and patch factory PCs in OT and shopfloor environments.
- Oversee IT asset lifecycle management and disposal.

IT Infrastructure and Systems Specialist

Jun 2025 – Jan 2026

Aegis

- Configured and managed Cisco switches and other network devices.
- Implemented and maintained firewalls to protect the organization's network.
- Monitored and secured network traffic to ensure compliance with security standards.
- Troubleshoot and resolved network-related issues.
- Administered Dell iDRAC and PowerScale storage systems.
- Configured and maintained RAID setups for optimized performance and redundancy.
- Managed virtualization platforms, including VMware ESXi, and Proxmox.
- Performed regular server maintenance and hardware upgrades.
- Administered Active Directory Domain Services for user management and authentication.
- Ensured group policies, domain trusts, and security configurations are up to date.
- Managed and optimized SQL Server and Oracle databases.
- Performed regular database backups and recovery testing.
- Troubleshoot and resolved database performance issues.
- Developed and maintained a comprehensive backup strategy.
- Configured and tested backup systems for data integrity and reliability.
- Designed and executed disaster recovery plans to minimize downtime.
- Worked closely with the Technical Support team to resolve escalated hardware or software issues.
- Provided training and support for IT staff on advanced system management tools.
- Documented processes and maintained an updated IT knowledge base.

CERTIFICATIONS & TRAINING

- Microsoft Certified Solutions Associate (MCSA).
- Microsoft Azure Fundamentals (AZ-900).
- Microsoft Azure Administrator (AZ-104).
- Microsoft Azure Security Technologies (AZ-500).
- Microsoft Azure Network Engineer Associate (AZ-700).
- Veeam Certified Engineer (VMCE).
- Cisco Certified Network Associate (CCNA).
- Fortinet Network Security Expert (NSE4).
- Sophos.

EDUCATION

El Shorouk Academy

Bachelor of Science (BSc) in Management Information Systems (MIS)

Al Shorouk City, Cairo

Aug 2019 – Sep 2023

TECHNICAL SKILLS

Cloud & Microsoft Technologies: Microsoft Azure (Virtual Machines, Virtual Networks, Storage Accounts, Microsoft Entra ID, RBAC, NSGs, Azure Backup, Azure Monitor), Microsoft 365 Administration, Azure CLI.

Windows Infrastructure: Windows Server 2016/2019/2022, Active Directory Domain Services (AD DS), Group Policy (GPO), DNS, DHCP, DFS, File Services, Remote Desktop Services (RDS).

Networking: TCP/IP, LAN/WAN, VLANs, Routing, VPN, NAT, Cisco Switching, Cisco ISE, FortiGate Firewalls, Sophos Firewall, Network Troubleshooting

Virtualization: VMware ESXi, VMware vCenter, Hyper-V, Proxmox VE, Proxmox Backup Server (PBS)

Backup & Disaster Recovery: Veeam Backup & Replication, Backup & Restore, Disaster Recovery Planning, Recovery Testing

Security: Microsoft Entra ID, Azure RBAC, Network Security Groups (NSGs), SSL Certificates, FortiGate, Sophos, VPN, Security Hardening

Automation & Scripting: PowerShell, Azure CLI, ARM Templates, Bicep (Fundamentals)

Storage: IBM SAN, Dell PowerScale, RAID, NAS Storage

Database Management: Microsoft SQL Server (Administration & Backup)

Monitoring & Remote Support: Windows Event Viewer, Performance Monitoring, TeamViewer, AnyDesk, RustDesk, RDP

LANGUAGES

- **Arabic:** Native proficiency.
- **English:** Professional working proficiency.
